

Nutrite Professional Turf Fertilizer with 0.42% **Prodiamine Herbicide**

For selective preemergence control of grass and broadleaf weeds in:

 Established Turf Grasses (excluding golf course putting greens) and lawns

 Landscape Ornamentals (including established perennials and wildflower plantings)

.13.0%

13.0% Urea Nitrogen'

Derived from: Urea, Polymer-coated, sulfur-coated urea.

*3.6% Slowly available nitrogen from polymer-coated, sulfur-coated urea.

ACTIVE INGREDIENT:	
Prodiamine, [N ³ ,N ³ -Di-n-propyl-2,4-dinitro-6-	0.42%
(trifluoromethyl)-m-phenylenediamine	
INERT INGREDIENTS	<u>99.58%</u>
TOTAL	100.00%

KEEP OUT OF REACH OF CHILDREN CAUTION

EPA REG. NO. 53883-297-90561 EPA EST. NO. 87245-CAN-001 (C) EPA EST. NO. 089135-AZ-001 (A) EPA EST. NO. 90561-NC-001 (N) *Number in parentheses used is first letter of lot number * If lot begins "C", Made In Canada * If lot begins "A" or "N", Made In USA

Product Code: P152135N Net Wt. 50 lb (22.68 kg)

MANUFACTURED. GUARANTEED AND DISTRIBUTED BY: Ferti Technologies 111 McNess Road, Statesvilles, NC 28677

PRECAUTIONARY STATEMENTS Hazards to Humans & Domestic Animals

CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wear protective evewear. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

FIRST AID	
IF IN EYES:	 Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after 5 minutes, then continue rinsing. Call a poison control center or doctor, for treatment advice.
IF SWALLOWED:	 Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF ON SKIN OR	 Take off contaminated clothing. Rinse skin

CLOTHING:	immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.
IF INHALED:	 Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible. Call a poison control center or doctor for further treatment advice.
HOT LINE NUMBER	

HOT LINE

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For information on this pesticide product (including health concerns, medical emergencies, or pesticide incidents), call the National Pesticide Information Center at 1-800-858-7378.

NVIRONMENTAL HAZARDS

his product has low solubility in water. At the limits of solubility, this product is not oxic to fish. However, at concentrations above the level of water solubility, it may be oxic to fish. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent sites. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or frainage systems

DIRECTIONS FOR USE

t is a violation of Federal Law to use this product in a manner inconsistent with its abeling.

his product is a selective preemergence herbicide that provides residual control of nany grass and broadleaf weeds in:

- Established turf grasses (excluding golf course putting greens) and lawns - Landscape ornamentals

Established perennials and wildflower plantings

This product controls susceptible weeds by inhibiting weed seeds germination and root development. Most effective weed control will be obtained when it is activated by at east 1/2 inch of rainfall, irrigation, or shallow (1 to 2 inches) incorporation, prior to weed seed germination and within 14 days following application.

Not for use on plants being grown for; (1) Sale or other commercial use, (2) for commercial seed production, or (3) for research purposes. For use on plants intended for aesthetic purposes or climatic modification and being grown in ornamental gardens or parks, or on golf courses or lawns and grounds.

Do not graze or feed livestock forage cut from areas treated with this product. Do not apply aerially. Do not apply to golf course putting greens. Do not apply this product through any type of irrigation system.

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON T LABEL MAY RESULT IN POOR WEED CONTROL, CROP INJURY, OR ILLEGAL RESIDUES

WEEDS CONTROLLED

When used in accordance with this label this product will provide control of the following weeds

Barnyardgrass, Bluegrass, Annual (Poa annua), Carpetweed, Chickweed, common Chickweed, mouse ear (from seed), Craborass (large, smooth), Crowfootgrass, Cupgrass, Woolly, Foxtails, Annual, Goosegrassi, Henbit, Itchgrass, Johnsongrass (from seed), Junglerice, Knotweed, Kochia, Lambsquarter, common, Lovegrass, Panicum (Texas, Fall, Browntop), Pigweed, Purslane, common, Pusley,, Florida, Rescuegrass³, Shepherd's Purse², Signalgrass, Broadleaf, Speedwell, Persian, Sprangletop, Spurge, Prostrate, Witchgrass, Woodsorrel, Yellow (from seed)

ermination

recommended for each turf species. All applications must be made prior to germination

Apply uniformly with suitable, calibrated application equipment.

ESTABLISHED TURF:

This product is a selective preemergence herbicide that, when properly applied, will control certain grass and broadleaf weeds in established turf grasses and lawns. The maximum amount of this product that may be applied per year is given for each turf grass species in the Maximum Annual Rates section of this label. Most effective weed control in turf grasses will be obtained when this product is activated by at least 0.5 inches of rainfall or irrigation prior to weed seed germination and within 14 days following application. See the map below for approximate crabgrass seed germination dates

CRABGRASS SEED GERMINATION DATES Approximate Date

USE PRECAUTIONS AND RESTRICTIONS: The following precautions apply to the use of this product in turf grasses and lawns; (1) Application of this product may thin emerged annual bluegrass and newly overseeded grasses. (2) Do not apply to overseeded turf within 60 days after seeding or until after the second mowing, whichever is longer. Injury to desirable seedlings is likely if this product is applied before seedling secondary roots are in the second inch of soil, not thatch plus soil. (3) Do not cut (harvest) treated sod before 120 days after application. Do not apply to newly set sod until the following year. (4) Application of this product to turf stressed by drought, low fertility, or pest damage may result in turf injury. (5) Disturbing the herbicide barrier with cultural practices such as disking may result in reduced weed control. (6) Do not apply this product to putting greens or areas where dichondra, colonial bentgrass, velvet bentgrass or annual bluegrass (Poa annua) are desirable species.

Turf Species:	Lbs. Product/A [or]	Lbs. Product/ 1000 sq. ft.	Lbs. a.i/A
Creeping Bentgrass	155	3.6	0.65
Creeping Red Fescue	179	4.1	0.75
Buffalograss Kentucky Bluegrass Perennial Ryegrass	238	5.5	1.0
Bermudagrass ⁽²⁾ Bahiagrass Centipedegrass Seashore Paspalum St. Augustinegrass Tall Fescue (including turf-type) Zovsia	357	8.2	1.5

These are the maximum rates per calendar year by species limitations.

²May be used on newly sprigged or plugged Bermudagrass at rates not to exceed 0.5 Ib. a.i./acre (equal to 119 lbs./ A of this product [or] equal to 2.7 lbs./1000 sq. ft. of this product). Newly sprigged or plugged Bermudagrass stolon rooting may be temporarily retarded. Suppression only of Foxtail, Goosegrass, and Rescuegrass due to reduced product rates used in sprigging situations.

- Do not apply more than 1.5 lbs. a.i. per calendar year per acre (equal to 357 lbs./A of this product for] equal to 8.2 lbs./1000 sq. ft. of this product).

 Use higher rates of this product to achieve higher levels of fertility and longer periods of weed control for each turf type, but do not exceed the maximum application rates specified in the Maximum Annual Rates Table

WHEN TO APPLY AFTER OVERSEEDING TURF

Do not apply to overseeded turf within 60 days after seeding or until after the second mowing, whichever is longer. Injury to desirable seedlings is likely if this product is applied before seedling secondary roots are in the second inch of soil, not thatch plus soil

WHEN TO OVERSEED AFTER APPLICATION

This product will inhibit the germination of turf species if overseeded too soon after application. Follow rates and intervals in the following table below for best

I.D. D.	D. D. dual/4000	Month	Months I	Before Overseeding	
Lbs Product/Acre	LBs Product/1000 sq. ft.	LBs ai/A	North	Transition	South
119	2.7	0.50	4	4	4
119 155	3.6	0.65	5	4	4
179	4.1	0.75	6	5	5
190	4.4	0.80	-	6	6
238	5.5	1.00	-	7	7
271	6.2	114	-	-	9
310	7.1	1.30	-	-	10
357	8.2	1.50	-	-	12

SPREADER SETTINGS

Spreader settings vary by make and model of spreader. Calibrate individual spreaders are calibrated for the specific product that is to be applied. Information on spreader make and model and suggested settings will be available at time of label printing. Use a walking speed of 3 miles per hour.

Granular Spreader Settings^{1,2,3}

Make and Models	2.7 lb./1,000 sq. ft. (0.50 lb. ai/A) (Treats 18,520 sq. ft.)	4.1 lb./1,000 sq. ft. (0.75 lb. ai/A) (Treats 12,195 sq. ft.)	5.5 lb./1,000 sq. ft. (1.0 lb. ai/A) (Treats 9,090 sq. ft.)
Scotts R-8A	1	J	J 1/2
Accupro 2000	J	K	K 1⁄2
Prizelawn BF-1 / CBR IV	I	J	J 1⁄2
Lesco (Letter/Number)	D/10	E ½ /13	G/16
Earthway Rotary	11.5	13.5	15
Cyclone/Spyker	4	4.25	4.75

Note: All of calibration starting points given above are for wheel-to-wheel coverage (100% overlap)

1 Place Holde

2Application Rates for example only - do not exceed the maximum annual application rate of 1.5 lb a.i./1000 sq. ft. (8.2 lb product/1000 sq. ft.)

LANDSCAPE ORNAMENTALS

Including Established Perennials and Wildflower Plantings

This product may be applied for residual preemergence weed control in ornamentals.

Use rates and When to Apply

Apply in fall and/or spring, 0.65 to 1.5 lbs. active ingredient per acre, which is equal to 3.6 to 8.21bs. of this product per 1,000 sq. ft. of ornamental plantings; therefore 20 lbs of this product will treat 2,439 to 5,556 sq. ft. Use the higher rates of application for longer control periods. Sequential applications may be made as long as the total amount of product applied does not exceed the maximum annual application rate of 1.5 lbs. a.i. per acre.

Established Landscape Ornamentals

This product may be applied to established ornamentals as a broadcast, over the top, or directed application. Irrigation or rainfall soon after application will wash residues off plant foliage and activate it into the soil.

Newly Transplanted Landscape Ornamentals

This product may be applied to newly transplanted ornamentals as a broadcast, over the top, or directed application. Delay application to allow soil to settle around new transplants and water thoroughly before applying this product. Apply after cuttings form roots and become established. Apply before budding/grafting or after buds/grafts have taken to avoid any inhibition of the tissue union.

Tolerant Ornamental Species

This product will not harm most trees, shrubs, vines and flowers. The species listed below are tolerant to this product. Best results will be obtained when it is uniformly applied to the soil surface; avoid applying to ornamental shoots which may defeat the effort to get uniform distribution on the soil surface. This product may be applied over the top of these species. When plants are under stress (such as heat, drought or frost damage) some cultivars of listed plants may be sensitive to this product.

STORAGE AND DISPOSAL

STORAGE: Store this product in its original container in a dry, cool, secured area. Do not contaminate water, foodstuffs, feed, or seed by storage or disposal. PRODUCT DISPOSAL: As a responsible environmental practice, where possible, it is recommended that all of the contents of the bag be used, carefully following label directions and precautions.

CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. Completely empty bag into application equipment. Then offer for recycling, if available, or dispose of empty bag in a sanitary landfill or by incineration or, if allowed by state and local authorities, by burning. If burned stay out of smoke.

RATES OF APPLICATION

This product may be applied as a single application or in sequential applications to control weeds germinating throughout the year. All applications must be made prior to germination of the target weeds. This product will not control established weeds. Maximum use rate selection should be based on turf species. The length of time of residual weed control provided by this product is related to the rate applied

MAXIMUM ANNUAL RATES

This product is for use on the turf grass species listed in the following table. Do not exceed the maximum yearly rate as given in the following table:

THIS	Maximum Application Rate/Cal	lendar Year of turf fer	tilizer by turf grass	species ⁽¹⁾
L	Turf Species:	Lbs. Product/A [or]	Lbs. Product/ 1000 sq. ft.	Lbs. a.i/A
	Creeping Bentgrass	155	3.6	0.65
	Creeping Red Fescue	179	4.1	0.75
n,	Buffalograss Kentucky Bluegrass Perennial Ryegrass	238	5.5	1.0
ą. ft.	Bermudagrass ⁽²⁾ Bahiagrass Centipedegrass Seashore Paspalum St. Augustinegrass	357	8.2	1.5

In many areas a single application of 0.651b. to 1.5 lb. active ingredient per acre (equal to 155 lbs. to 357 lbs./ A of this product [or] equal to 3.6 to 8.2 lbs./10130 sq. of this product) will control goosegrass. However, under heavy goosegrass pressure and/or an extended growing season, most effective weed control may be obtained by naking an initial application of 0.65 lb. to 1.0 lb. a.i. per acre (equal to 155 lbs. to 238 bs./A of this product [or] equal to 3.6 to 5.5 lbs./1000 sq. ft of this product) followed after 60 to 90 days by a second application at doses that would not exceed those iven in the Maximum Annual Rate Table. Do not exceed the maximum rate for turf arass species listed in the Maximum Annual Rate Table above. Applications for this weed should be made in late summer, fall, or winter prior to

Suppression only. Sequential applications may be made so long as the total amount of product applied does not exceed the maximum annual application rates

CONDITIONS OF SALE AND WARRANTY

The DIRECTIONS FOR USE of this product are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop, injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of Ferti Technologies or the Seller. All such risks shall be assumed by the Buyer.

Ferti Technologies warrants that this product conforms to the chemical description on the label, and is reasonably fit for the purposes set forth in the DIRECTIONS FOR USE, when it is used in accordance with such directions, subject to the inherent risks mentioned above.

FERTI TECHNOLOGIES NEITHER MAKES NOR INTENDS, NOR DOES IT AUTHORIZE ANY AGENT OR REPRESENTATIVE TO MAKE ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, AND IT EXPRESSLY EXCLUDES AND DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY EXTENDS TO, AND THE BUYER SHALL BE SOLELY RESPONSIBLE FOR ANY AND ALL LOSS OR DAMAGE WHICH RESULTS FROM THE USE OF THIS PRODUCT IN ANY MANNER WHICH IS INCONSISTENT WITH THE LABEL DIRECTIONS, WARNING, OR CAUTIONS. BUYER'S EXCLUSIVE REMEDY AND MANUFACTURER'S OR SELLER'S EXCLUSIVE LIABILITY FOR ANY AND ALL CLAIMS, LOSSES, DAMAGES, OR INJURIES RESULTING FROM THE USE OF THIS DRODLING OF THIS PRODUCT. WHETHER OR NOT BASED IN CONTRACT, NEGLIGENCE, STRICT LIABILITY IN TORT OR OTHERWISE, SHALL BE LIMITED, AT THE MANUFACTURER'S OPTION TO REPLACEMENT OF, OR THE REPAYMENT OF THE PURCHASE

It is a violation of law in Maryland, New Jersey and New Hampshire to apply this product to turf at a rate that results in greater than 0.7 lb per 1,000 sq.ft. of readily available nitrogen or more than 0.9 lb per 1,000 sq.ft. of total nitrogen with a least 20% of which shall consist of slow release nitrogen per application. Additional restrictions apply to total nitrogen applied to turf per season. Other state and local restrictions may apply.

Virginia Applications: No more than 0.7 lb per 1,000 sq.ft. of readily available nitrogen during any given 30 day period. No more than 0.9 lb (cool season grasses) or 1.0 lb (warm season grasses) per 1,000 sq.ft. of total nitrogen with a least 20% of which shall consist of slow release nitrogen during any given 30 day period.

If this product is being sold in a state requiring the publication of information regarding its metal content, information regarding the contents and levels of metals in this product is available at the following website: http://www.aapfco.org/metals.htm

Do not apply near water storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn, and sweep any product that lands on the driveway, sidewalk, or street back onto your lawn.
